## Partner Spotlight - Crystal Creamery

Left to Right: Brian Carden (Vice President Sales & Marketing), Walter Mendez (Vice President Human Resources), Dennis

e-Mission Control is now craving ice cream as a result of our partnership with California's [Crystal Creamery](#). The creamery, which has been in business over 120 years, is committed to sustainable operations and reducing its impact on the environment. Awarded at a special green ribbon cutting (pictured), the dairy was Green Business Certified by the Stanislaus County Green Business Network. This certification means that Crystal Creamery meets rigorous standards to operate sustainably while reducing its environmental footprint. Some green initiatives the company has accomplished include:

- The installation of a 1.1 MW solar panel system to reduce energy demand
- More than 97% of the dairy company's waste is recycled
- Replacing all lighting with energy-efficient LED lights
- Installation of energy-efficient equipment to reduce energy needs during peak periods
- Water re-use measures implemented to reduce the use of municipal water

We can't wait to enjoy Crystal Creamery's milk, butter, ice cream, yogurt, and more, knowing that it was sustainably produced.

## Channel Partner Spotlight - Purfresh Wine

If you've recently enjoyed a glass of California or Oregon wine without tasting a smoke taint, you may have to thank [Purfresh Wine](#), e-Mission Control's April 2022 Channel Partner Spotlight. We had the pleasure of meeting Purfresh Wine CEO, Christian DeBlasio, at the Oregon Wine Symposium in March 2022 and learned how his business has saved wineries millions of dollars from loss of product. As fire seasons intensify, Purfresh saves grape crops which have been affected by smoke. Purfresh Wine's O3 technology treats wine grapes pre-crush to improve fermentation and overall wine quality, and to remove smoke taint caused from wildfires.

To learn more about how Purfresh Wine can rescue smoke damaged crops, click [here](#).

## **e-Powerment Focus: Helping Nonprofits Achieve Green Goals**

Non-profits want to be green too! e-Mission Control's [e-Powerment Program](#) helps fund clean transportation projects for non-profit organizations. e-Mission Control partners fund the e-Powerment program by redirecting a portion (as small as 1%) of their LCFS/CFP revenue to non-profits. We handle the rest!

Our first e-Powerment recipient is Alameda County Community Food Bank, based in Oakland, California. Through the e-Powerment Program application process, the food bank has requested an electric floor scrubbing machine, an electric forklift, and electric charging stations for their staff and clients.

The Alameda County Community Food Bank operates an 118,000 square foot food distribution center that allows individuals in need to obtain the food they need to feed themselves and their families. They also have mobile pantries and donate food to Alameda County organizations serving the homeless. Now they are serving over 400,000 people a week! To learn more about the organization and how it's helping the community, check out their latest [video](#).

Help the Alameda County Food bank and other community non-profits go green through e-Powerment. It's so easy! Pledge today.
